PILOTDNA

STUDENT PROGRAMME OVERVIEW
Aviationexam s.r.o. · Prague · ver 1.0 · Nov 3, 2026

Your studying is already telling your story.

The months you spend preparing for your ATPL exams show what no assessment day can: **how you really work**. PilotDNA turns that into two things — a **Readiness Dashboard** that helps you study smarter, and the chance to be **introduced to a partner airline** when your preparation stands out.

✓ Free for students — forever ✓ Opt-in only ✓ 18+ · ATPL track ✓ You approve every airline individually ✓ Withdraw anytime

One programme. Two reasons to join.

Your Readiness Dashboard
See how your preparation is really going: where you're strong, which subjects need attention, how ready you are for the real exams. Yours whether or not you ever share anything with an airline.

A door to partner airlines
When your long-term preparation stands out, PilotDNA can introduce you to a partner airline you choose — as a first-officer, cadet or type-rating candidate. Airlines see months of real evidence of how you work, not just one assessment day.

What builds your profile

Question-bank study
Long-term performance & study patterns

Study-book reading
Reading depth & theory integration

ICAO English exam
Rated by a human examiner

Aviation psychologist
Structured suitability session

Everything runs **only with your consent** — and yes, this is profiling; we say so openly. The ICAO assessment and psychologist session come later, only for candidates moving toward an airline introduction.

You stay in control

- **Airlines see nothing** until you choose one and consent to share with it specifically — then a curated summary of your strengths, never your raw study data.
- **A human reviews** every qualification and every introduction — never an algorithm alone.
- **Withdraw anytime.** Your profile becomes immediately unavailable to airlines; your use of Aviationexam is completely unaffected.
- **Full GDPR rights** — access, export, erasure; separate consents for participation, profiling and sharing.

How it works

1. **Opt in** 18+ · ATPL
   A few clicks, separate consents — and joining is **never a condition** of using Aviationexam.
2. **Study as you normally would**
   Nothing to perform, nothing to game. PilotDNA reads consistent, genuine preparation over months — the kind you need to pass your exams anyway.
3. **Your profile builds quietly**
   Your dashboard shows your strengths and development areas as your preparation accumulates.
4. **Choose an airline**
   Qualified candidates apply to **one partner airline at a time**. Each airline publishes its hiring outlook so you can plan. You decide what is shared, with that airline specifically.
5. **Get invited — or choose again**
   An interested airline invites you into its own selection process. No response within the decision window? You're **automatically free** to apply elsewhere.

Straight answers

How do I get selected?
By preparing well, consistently, over time. We deliberately don't publish the criteria — so there's nothing to game, and your natural preparation is exactly what counts.

Is this a job guarantee?
No. An introduction gets you into an airline's own selection process. The interview, the assessment, the decision — those are still **yours to win**.

What does it cost?
Nothing, ever. And if an airline hires you, you owe Aviationexam nothing.

What if I never want to share with airlines?
Then don't — the Readiness Dashboard is still yours. Sharing is a separate choice you make per airline, or never.

Who can join?
Students 18 or older on the ATPL track. (PPL and CPL-only students: not yet.)

KEEP STUDYING — IT WILL COUNT.
When you enrol, **you decide when PilotDNA starts evaluating your studies**: from that day forward — or retroactively, across the preparation you've already done on Aviationexam. The hours you're putting in right now won't be wasted.

Enrolment opens in stages from early January 2027.
Everyone on the notification list is contacted first. To join it, email us from the address you use for your Aviationexam account. **Received this document from us directly? You're already on the list.**
